Owner's Manual

For Hydropool Hot Tubs Manufactured After January 2004

HYDROPOL INDUSTRIES

SPACOUSTIC™ MARINE AUDIO SYSTEM CONTINUED

INITIAL START-UP

What makes your Hydropol Spacoustic™ integrated Audio System so unique is the patented hydraulic lift mechanism. Once your Hydropol spa is filled and operating, just follow these 4 easy steps:

- 1 press the 'jets' pad on the spa topside control to put pump 1 into high speed
- 2 open the blue-handled air purge valve, wait about 30 seconds to allow any trapped air to evacuate from the system
- 3 close the air-purge valve

OPERATING INSTRUCTIONS

To raise the speakers:

Press the 'jets' pad on the hot tub topside control to put P1* on high speed, then press and hold the PWR button on the

radio remote control or the PWR button on the radio, and the marine speakers will rise up from their recessed position.

To lower the speakers:

Press and hold the PWR button on the radio remote control or the PWR button on the radio, and the marine speakers will lower.

Complete operating instructions for the AM/FM CD player are found in the Clarion Owner's Manual included with your new Hydropol Hot tub.

* see section HYDROPOL CONTROL SYSTEMS

WINTERIZING YOUR SPACOUSTIC™ SYSTEM

The Spacoustic™ hydraulics is incorporated within the Thermal Loc multi-layer insulation system. During normal hot tub operation this protects against freezing, even in the coldest winter conditions. If you do not intend to operate your hot tub in the winter season (or in any condition where freezing may occur), it is absolutely necessary to completely drain the hydraulic system. Any damage caused by freezing will not be covered under warranty.

While the water is draining* with the hot tub control system operating in 'Standby/Drain Assist' mode, simply open the air-purge valve. Water will not come out of the valve. The pump will draw air through the air-purge valve, and the water in the Spacoustic hydraulic system will be evacuated through the pump. Leave the valve open after draining.

* See section DRAINING YOUR HOT TUB

This product is warranted against all defects in material workmanship for a period of one year from the date of original purchase.

The Self-Clean system cleanses 100% of the water every 15 minutes and takes the work away with a hands-free system to safe guard you and your family.

©2007 Hydropool Hot Tubs

Designed & Engineered For Comfort, Quality and Performance

For over 20 years, Hydropool™, the manufacturer of Serenity's, has evolved with what we call "continuous engineering". We strive to be the best and nothing less will do. The result is a hot tub renowned worldwide for quality and performance. All models are ergonomically designed for body support and comfort. Soft, comfortable pillows gently support your head & neck, while wide, lumbar support seats cradle your body. Serenity's "Versa Massage" unique hydrotherapy system adds the final touch, massaging every inch of your body.

Built-in hand rail for your comfort.

1 Body Form Lounger (with extra soft head pillow) Ergonomically designed for full body support & comfort with up to 12 hydrotherapy jets targeting pressure points from your neck to your calves & toes.

2 Multi-sage Seat (with extra soft head pillow) Provides extensive back & neck therapy in this deep comfortable seat.

3 Versa Massage Chair (with extra soft head pillow) Provides complete back, shoulder & neck therapy in this lumbar supported chair.

4 Cool Down Seat Provides comfortable light massage for those desiring to keep their upper body out of the water.

5 6 Contoured Bench Seats Provides medium depth seating with a light massage.

Insulated to Keep Operating Expense Less Than \$1.00 per Day!

Serenity's™ Double Thermal Loc System – follows the concept of home insulation and insulates the walls, floor and top of the hot tub while leaving an interior air space that allows the heat of the motor(s) to circulate around the tub and minimize heater requirements. Other hot tubs either simply insulate the shell or fully fill the area between the cabinet and the shell requiring the hot air created by the pump(s) motor to be exhausted and the free heat source wasted. Serenity's™ Double Thermal Loc System:

How Most Other Manufacturers Insulate

Sample A

Full foam system loses free heat energy from motor. Difficult access for after market service.

Sample B

Only shell insulated. Major heat loss & no plumbing support

Sample C

Only cabinet walls & floor insulated. No plumbing support. Can overheat in warm weather due to no insulation between motor & hot tub water.

COMPANY PROFILE | MARKET OVERVIEW | PRODUCT RANGE | DEALER SUPPORT | THE NEXT STEPS

Our products are a pleasure to sell.
We mix business with pleasure.

OUR UNIQUE MIX of residential hot tubs, commercial hot tubs, swim spas, and accessories such as gazebo's allows you to maximize the potential of making a sale with each and every customer that you come into contact with.

HYDROPOOL® HOT TUBS is Canada's premiere hot tub manufacturer with over 9 models, 26 configurations and 12 colors to choose from.

Hydropool's® superior proprietary product attributes including the "Self Clean Plus", Double Thermal Lock, Versa Massage Hydrotherapy and Heirloom Quality Clear Cedar Cabinetry provide you with exclusive industry leading innovations, innovations that are rivaled by few and unmatched by none.

Over the years, Hydropool® has learned that not everyone wants the same hydrotherapy, features and interior design in a hot tub. That is why Hydropool® has one of the largest selections of designs and colours available. In addition to that, Hydropool® offers various levels of hydrotherapy in each and every model. Should our preset packages not meet the needs of your customer, we are more than happy to build a hot tub to meet your customers exact specifications.

Backed by one of the best warranties in the business, your customer is sure to have peace of mind while your service department is compensated promptly and equitably for warranty service provided.

SERENITY® HOT TUBS are manufactured with the same quality components and

backed by the same industry leading warranty as their Hydropool® counterparts. These outstanding hot tubs are positioned to meet the needs of the value priced consumer. A consumer that may normally purchase from a mass merchant or a discount hot tub retailer. You no longer have to fear losing a sale as our line up allows you to offer something to all.

Serenity® Hot Tubs offer one of the most comfortable designs in the industry combined with spacious deep seating. Offered in over 4 models, 7 configurations and 12 colours, there is sure to be a model that is the perfect fit for your customer. The new sleek designs are available in a multitude of hydrotherapy packages and are available with a wide array of the most popular features and options.

GAZEBOS & SWIM SPAS

As an industry leader, we offer our dealers some very exciting hot tub accessories and add on products. From our state of the art Multi Media system to our full line of hot tub gazebo's, to our unique line of Hydropool® Swim Spas it is virtually one stop shopping. Benefit from displaying two gazebo's while being able to offer your customer the ability to choose from a catalogue of over 12 models that can be ordered and delivered with the hot tub of their dreams.

COMMERCIAL HOT TUBS

Continue to say "Yes" with our commercial line of hot tubs for hotels, condo's, health clubs etc. Tap into Hydropool's® 30 years of commercial expertise and increase your profits today!

Our range of hot tub products along with our complementary products have wide appeal to customers and homeowners.
